PROJECTS

Yourmoon

- An app that allows user registration/login to customize products before adding to cart; users can add or delete reviews
- **Built With:** Back End (Node Express.js, PostgreSQL), Front End (React, JavaScript, HTML/CSS, RESTful)

Coin World

- This is coin stock tracking app. User can add, delete, reset the coin list. And user can see the Coin's detail
- **Built With:** Front-end(React, React hooks, JavaScript, HTML/CSS, Web APIs, Chart.js)

Petful

- An app that allows users to navigate through pet availability and adoption. Adoption here is first in, first out. Adoption is possible after the early adopter is over
- **Built With:** Back End (Node Express.js, PostgreSQL), Front End (React, JavaScript, HTML/CSS, RESTful)
