Previously, I obtained a certificate and knowledge of Software Engineering through Thinkful Bootcamp. Based on the knowledge I learned at boot camp, I increased my practical experience by working to develop back-end front-end, and maintenance in my current workplace. In addition, I had a valuable experience to increase many skills that I had not learned in boot camp.

As a Full Stack developer, I want to share my skills. Using these skills, I'm gaining experience in various projects and practices.

Git, Github, VSCode

**Language:** JavaScript, TypeScript

**Front-End:** React, React-admin, Material UI, React-bootstrap, GraphQL, Apollo Client, Vercel

**Back-End:** Node.js, Express.js, Passport, RestfulAPI, GraphQL, Apollo Server, Mongoose

**Database:** MongoDB, SQLServer, MySQL, PostgreSQL

**Test:** Jest

And, now I am also studying next.js to grow myself. I always aim to study and improve. Also, I always enjoy collaboration and want to communicate with my team members.

I will always try to make my progress become the development of the company, and I will always do my best to prove it. I believe that these skills would make me a great candidate for this position and I look forward to speaking with you further about my qualifications.
